

Migration Package– Cisco AXG migration to Vordel Gateway

KEY FACTS

Working with XML Gateway since the early 2002

Working with IAM and XML Gateway since the early 90's

More than 300 IAM engagements

Effective mix of Senior Architects, Architects, and Engineers

Premier go-to partner for Vordel for IDM implementation work

Acknowledged as Leading Entitlements System Integrator by Burton

Executed 50+ Access Management engagements

Built a number of enhancements & plugins for the Oracle/BEA engineering team

Developed extensive training material

Principals have been working with IDM for more than 15 years

SENA has developed a 'Cisco AXG migration to Vordel Gateway' offering to enable clients to implement and start using Vordel Gateway in a matter of weeks.

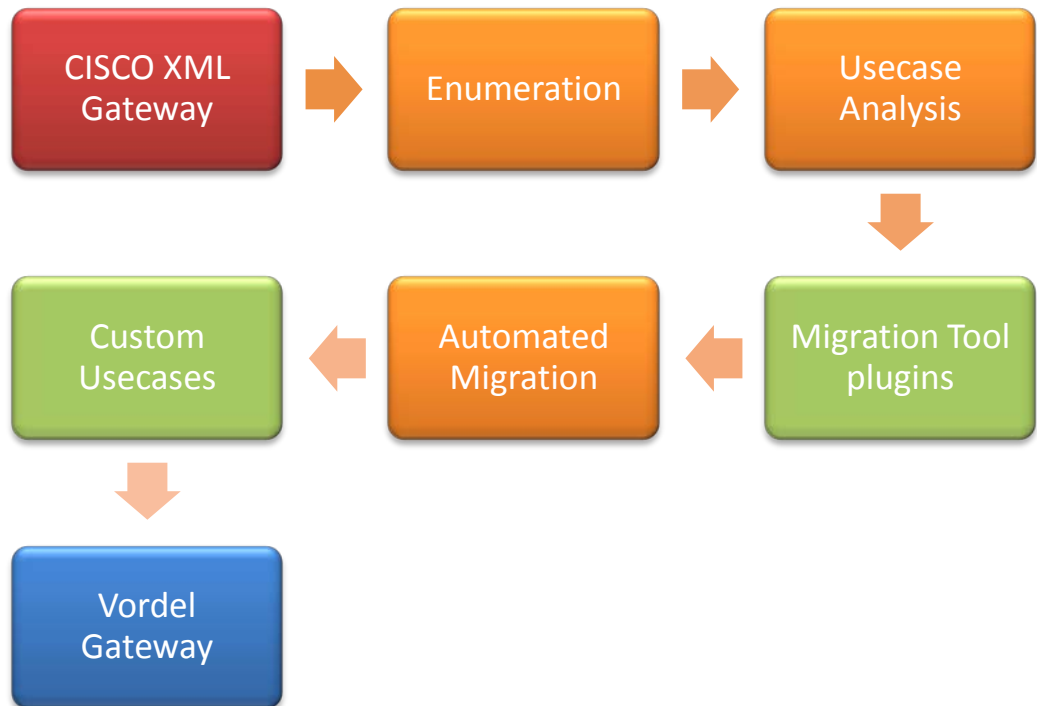

The offering leverages SENA's extensive intellectual property in the XML Gateway and Cisco policy migration tool set developed by SENA and Vordel in collaboration.

Migration package is a service that SENA provides for assessing the existing Cisco AXG deployment and migrating to Vordel Gateway. While doing so, SENA will provide its expert advice on leveraging some of the advanced capabilities of Vordel Gateway. The migrated solution will have an extensible architecture to address future use cases with ease.

Package Highlights

- Enumeration of existing services and features in Cisco AXG deployment.
- Assessment of existing deployment leading to analysis showing the best design and architecture for migration.
- Plugin based migration tool to address new use cases.
- Automatic migration of existing features to Vordel gateway

Migration Path

What Clients Say

“SENA has consistently delivered high value results against our aggressive timelines. “

“SENA has raised the bar against our other vendors for quality and cost during fast paced and highly technical engagements. “

“SENA has strengthened our strategic partnership.... All aspects of this engagement went very well.

“The responsiveness and flexibility shown by all SENA personnel is very much appreciated.”

Task	Description
Enumeration	Enumeration of features existing in your Cisco gateway implementation based on SENA’s IP and Tool set.
Use case Analysis	Based on above enumeration, use cases are classified as follows: <ul style="list-style-type: none"> • <i>Automated migration</i> • <i>Migration Tool use case gaps(leading to plugins)</i> • <i>Custom use cases</i>
Migration Tool Plugins	From the above analysis, if there are any use-cases that are not addressed OOTB by migration tool, appropriate plugins will be developed.
Automated Migration	Migration of Cisco policies to Vordel gateway using SENA’s migration tools.
Custom Use cases	If there is any customized enhancement existing in Cisco AXG, then those will be addressed as custom configurations in Vordel.

Package Pricing

Table below provides an estimated pricing for typical migration. We will review each client’s deployment to advise on any changes needed.

Review of current systems, Enumeration and Analysis	USD 99,000
